

Radiation Therapy Delivered in a Fraction of Time

Today and every day, the best treatment plans to improve cancer patient outcomes are everyone's top priority. When possible for select sites, hypofractionation and SBRT treatments are now more than ever being considered to decrease patient visits. Reducing trips to the clinic minimizes exposure to threatening viruses, providing patients and clinicians a safer environment.

Efficient throughput without compromised accuracy

CIVCO's Body Pro-Lok ONE™ SBRT system is easy-to use, allows customized patient setups and provides full body immobilization.

- Variable height adjustment with just one bridge
- Lateral offset ability allows the bridge and plate to adapt to the patient's natural posture and body type
- Tilting offset ability allows optimal patient positioning for enhanced gantry clearance
- Belt option provides pneumatic compression and immobilization to the abdominal region

Body Pro-Lok ONE™

Visit CIVCO's YouTube channel to learn how to integrate this unique solution into your radiotherapy program or contact us for a virtual or in-person demo!
