

Quality Strategy

Practice Assessment

- Determine reporting mechanism
 - Certified EHR (Contact EHR vendor directly to confirm if they will report your data to CMS)
 - Qualified Clinical Data Registry (QCDR) – [OOPI Reporting Registry](#)
 - Registry – [MIPSWizard](#)
 - Claims
 - [CMS Web Interface](#) - deadline to register has passed, June 30, 2017

- Select measures
 - [6 measures](#), including one outcome measure, **or**
 - Radiation Oncology Specialty Measure Set
 - Pain Intensity Quantified (Quality ID: 143)
 - Plan of Care for Pain (Quality ID: 144)
 - Radiation Dose Limits (Quality ID: 156)
 - Avoidance of Overuse of Bone Scan for Prostate Patients (Quality ID: 102)

- Determine reporting period based on the MIPS pace selected
 - Partial - which 90 days is best for you?
 - Full – have you captured the data for the measures since Jan. 1?

Scoring

$$\text{Quality Score} = \frac{\text{Measure Score} + \text{Bonus Score}}{\text{Total Possible Points}}$$

$$\text{Quality Category Points (towards CPS)} = (\text{Quality Score}) \times (60\%)$$

If you are [exempt](#) from the Advancing Care Information performance category, Quality will be reweighted to 85%

What can I do now?

- Review Radiation Oncology [Measure Set benchmarks](#) or selected measures [benchmarks](#)
- Review the [timeline](#) for important dates

Help!

- CMS
 - [Small practice, rural, or health professional shortage area](#)
 - [Large practice](#) (16 or more clinicians)

- ASTRO
 - MIPS@ASTRO.org
