In accordance with the guidelines for continuing medical education (CME) of the Accreditation Council for Continuing Medical Education (ACCME), The American Society for Radiation Oncology holds certain expectations for faculty presentations and materials that are a part of CME-accredited programs sponsored by The Society. As an ACCME accredited provider of CME activities, The Society must ensure that all programs meet ACCME guidelines, as well as the high standards and expectations of The Society’s membership. The expectations for faculty presentations listed below are provided to guide faculty as they develop the educational content of their presentations or publication.

**Continuing Medical Education- Disclosure of Vested Interest**

As our speaker, you are required to disclose to the audience at the beginning of your presentation and in accordance with ACCME standards and Food and Drug Administration requirements (title slide then disclosure slide):

- The existence of any financial or other relationship you have with the manufacturer(s) or any commercial product(s) or provider(s) of any commercial services discussed in an educational presentation.
- Any vested interest or their intention to discuss off-label use of pharmaceuticals or devices.

**Expectations**

- Presentations must be objective and free of commercial bias for or against any product or device. Slides and/or reference materials shall not, by their content or format, advance the specific proprietary interests of a commercial entity. Please review the ACCME Standards for Commercial Support.
- All clinical recommendations must be based on evidence that is accepted within the profession as adequate justification for their indications and contraindications in the care of patients. All scientific research referred to, reported or used to support or justify a patient care recommendation must conform to the generally accepted standards of experimental design, data collection and analysis.
- Presentations must give a balanced view of therapeutic options. Faculty use of generic names will contribute to the impartiality. If trade names are used, those of several companies should be use rather than only that of a single supporting company.
- Presentations must offer a balanced view of current medical practice that includes discussion of all available therapeutic products, including benefits and risks associated with each.
- Presentation materials must not include any commercial logos.
- Presentation materials must be HIPAA compliant (eg. Will only use de-identified patient information and/or will obtain written consent from the patient).
- Presentations must include the most recent data on subject matter.
- When relevant, presentations should emphasize safety and quality.
