# **Aggregate Report Card**

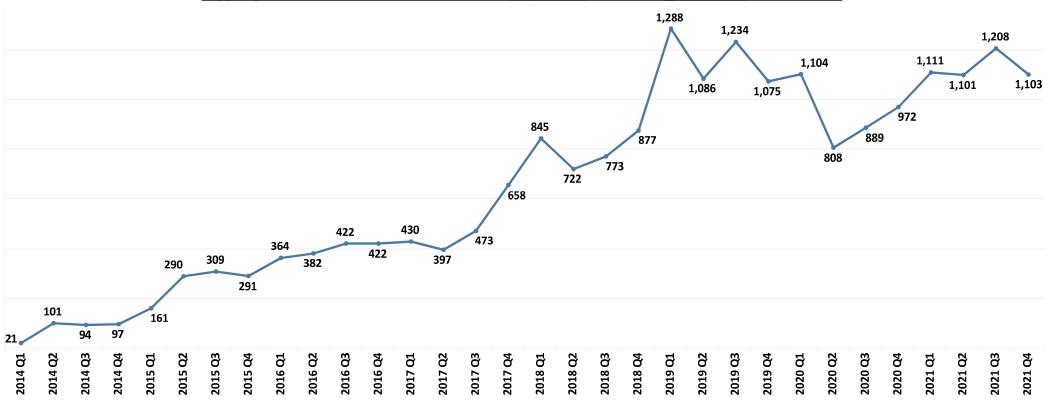

The timeframes utilized throughout this report are based on the timepoint of event submission (i.e., when the event was initially entered into the RO-ILS Portal, when the "Submit Event" form was completed). The national aggregate database only includes events that have been reviewed and reported to the PSO, which occurs after submission. All information in this report represent data in the national database. For this reason, the amounts provided for previous timeframes may change as older events are reviewed and reported to the PSO.

#### **Aggregate: Total Number of Events Reported to PSO by Quarter Submitted**

This graph displays how many events were submitted, reviewed, and reported to the PSO per quarter based on the date of submission.

#### **Aggregate: Event Classification**

nis graph depicts the distribution of data for data element #104 (Event\_Classification) on a bi-annual basis. The Operational/Process improvement answer option became available in the Q3 2016 data element update

■ Therapeutic Radiation Incident ■ Other Safety Incident ■ Near-miss ■ Unsafe condition ■ Operational/Process Improvement

This graph depicts the frequency of answer options for data element #208 (Occurred\_Workflow) based on the calendar year it was submitted. Users have the option to select more than one answer option, therefore, there is a potential for each year's total percentage to be greater than 100%. As a part of the Q3 2016 data element update, this question became required and an answer option of "Outside the Radiation therapy Workflow or Other" was added.

#### **Aggregate: Workflow Step Where Event Discovered**

This data is based on data element #207 (Discovered\_Workflow), presented in yearly increments. As a part of the Q3 2016 data element update, this question became required and an answer option of "Outside the Radiation therapy Workflow or Other" was added.

## **Aggregate: Workflow Step Where Event Occurred & Event Discovered**

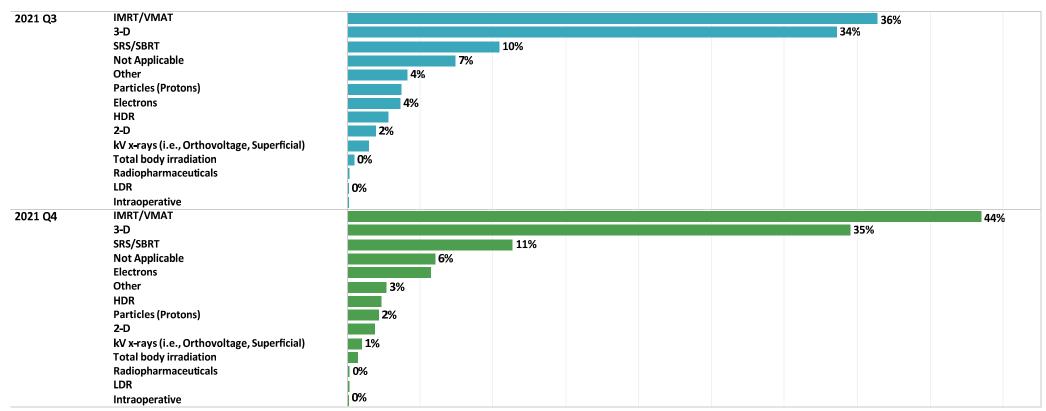

#### **Occurred Workflow**

This graph displays the overlap of where in the workflow events occurred (208. Occurred\_Workflow) and where it was discovered (207. Discovered\_Workflow) for the most recent quarter. The percentage is based on the total number of events that were discovered in that workflow step (e.g., of events that were discovered "before simulation").

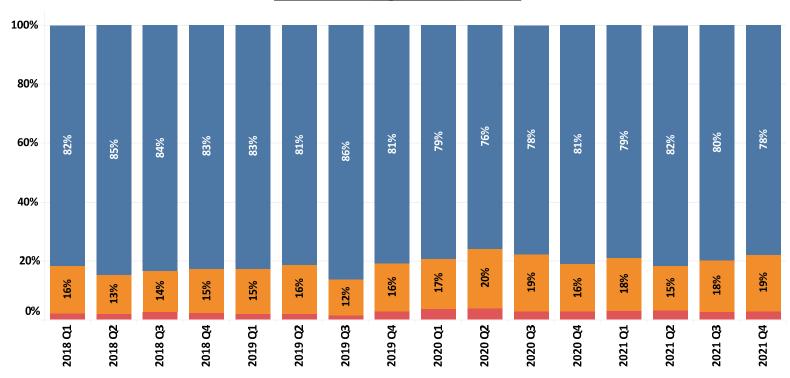

#### **Aggregate: Treatment Technique(s)**

This graph demonstrates the distribution of answers for data element #106 (Tx\_Technique) per quarter for the last two quarters. Users may be select more than one technique if pertinent to the event and thus the quarterly percentage total may be greater than 100%.

# **Aggregate: Significance Scale**

This graph shows the frequency of answers for data element #225 (Significance\_Scale) which asks, "In terms of risk to patient safety, how significant was this event?" This question was introduced in Q3 2016. The graph and table provide the severity percentages per quarter since 2017.
